We All Have Inventions

You can discuss and ask: Do you also want to become an inventor? What would you like to invent? Have you ever come across a problem or a need and thought of an invention that can help?

יְצִירָה

Making a Family Comic Strip

This book can inspire you to create your own family comic strip. Imagine some amusing

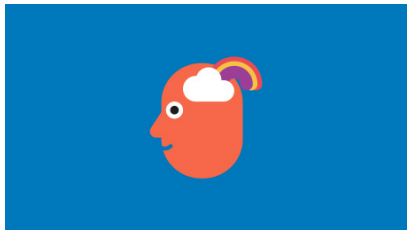

characters, and try to draw them while adding short sentences. What are your characters saying? What sort of interesting story can they tell?

הַעֲשָׂרָה

From the Book to Real Life

You can look around you and identify which of the inventions in this book are in your life. Perhaps the drip irrigation in your backyard? Or the cherry tomato salad at dinnertime? How about the game of Taki you enjoy playing? Next, you can write a thank you note to the inventor of that particular invention, and tell him or her how useful it is to you.

מִשְׂחָק

Our Home

You can also think about challenges in your daily lives with your family, and build an imaginary machine that can help deal with them using household items. A shoebox and old handle, for example, can turn into a laundry-folding machine, while a toilet-paper roll can become an innovative gardening tool.
